

# HOW TO USE A CINDERELLA

1 Check that the green light on the control panel is lit, indicating the unit is powered and ready for use.

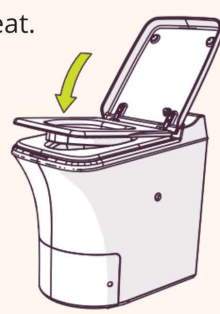

2 Lift the toilet lid and seat. A red light starts flashing. The ventilation fan starts.

3 Place a bowl liner in the bowl. Use a new liner for every visit.

4 Lower the seat. The toilet is now ready for use.

5 Use the toilet as usual. If little waste is produced, it may be helpful to pour some water into the bowl to add extra weight.

6 Close the toilet lid.

7 Push the "Start" button to drop the bowl liner and its contents into the incineration chamber. The Incineration process begins as soon as the hatch is closed.

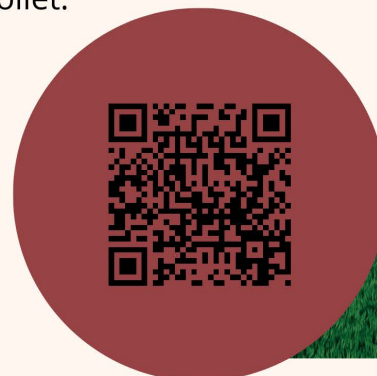

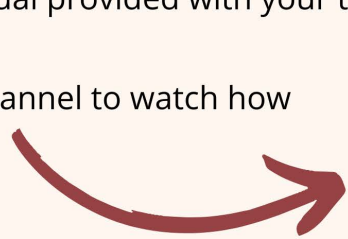

8 A constant yellow light will display during active incineration. The toilet may be used at any point. This will temporarily interrupt incineration. Incineration time may vary.

## INSTALLING CINDERELLA

Cinderella incineration toilets are easy to install, and comes as a complete kit! It is important that you follow the instructions listed in the installation manual provided with your toilet.

Visit our Youtube Channel to watch how this is done!

**MODERN AND ENVIRONMENTALLY FRIENDLY TOILET SOLUTIONS**

### What is an incineration toilet?

An incineration toilet is a sanitation system that uses high temperatures to burn human waste, reducing it to a sterile ash. It operates without the need for water, sewage or septic connections and used in areas where traditional sewage systems are not feasible, such as remote locations. The incineration process eliminates pathogens and reduces waste volume, making it a more environmentally friendly alternative to traditional flush toilets.
