

Ecoflo Zero Discharge System is a liquid storage tank that collects discharge from the Ecoflo composting systems. Liquid drains into the Zero Discharge storage tank via gravity feed. A pump then recirculates the liquid back into the tank where it is adsorbed or evaporated off. This system is ideal in sensitive areas where conventional absorption trenches may not be suitable.

Options:

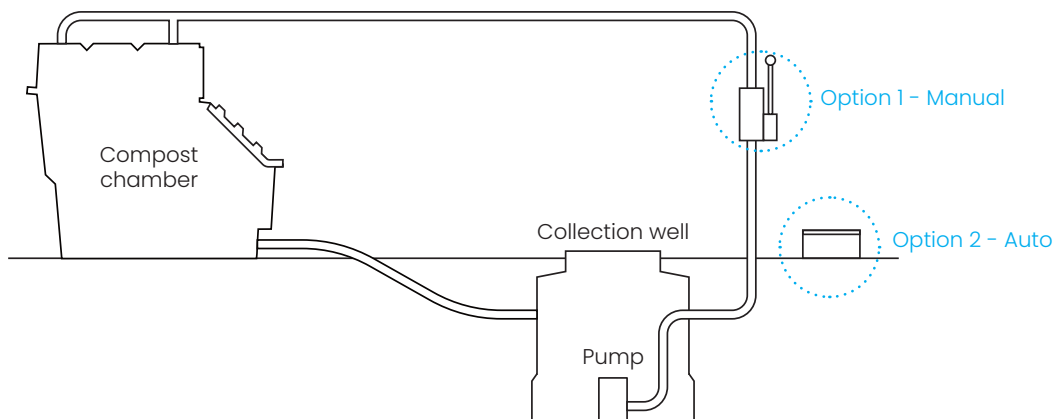

- Low Volume - Auto or Manual
- High Volume - Auto or Manual

Nature Clear Zero Discharge - Low Volume

- Suitable for batch systems
- Available in Auto or Manual version
- Lightweight and easy to install
- Collection well dimensions: 760mm L (810mm incl. inlet/outlet pipes) x 565mm W x 522mm H

Nature Clear Zero Discharge - High Volume

- Suitable for continuous systems
- Available in Auto or Manual version
- Easy to install
- Collection well dimensions: 1200mm H x 1150mm W
